QUESTION 1

You need to meet the technical requirement for VM4. What should you create and configure?

- A. an Azure Event Hub
- B. an Azure Notification Hub
- C. an Azure Logic App
- D. an Azure Service Bus

Correct Answer: A

Scenario: Create a workflow to send an email message when the settings of VM4 are modified.

You can start an automated logic app workflow when specific events happen in Azure resources or third-party resources. These resources can publish those events to an Azure event grid. In turn, the event grid pushes those events to

subscribers that have queues, webhooks, or event hubs as endpoints. As a subscriber, your logic app can wait for those events from the event grid before running automated workflows to perform tasks - without you writing any code.

QUESTION 2

You have an Azure Contoso DB account named Account1 that has one write region and four read regions.

You need to recommend a solution to ensure that, by default, any reads containers in Account1 will never see out writes. The solution must minimize costs.

What should you recommend?

- A. Configure Account1 to use the Strong consistency level.
- B. Create all the containers in Account1 as fixed.
- C. Create all the containers in Account1 as unlimited.
- D. Configure Account 1 to use the Consistent Prefix consistency level

Correct Answer: A

QUESTION 3

You have an Azure subscription that contains an Azure Service Fabric cluster and a Service Fabric application named FabricApp. You develop and package a Service Fabric application named AppPackage. AppPackage is saved in a

compressed folder named AppPackage.zip.

You upload AppPackage.zip to an external store.

You need to register AppPackage in the Azure subscription.

What should you do first?

- A. Run the New-ServiceFabricApplication cmdlet.
- B. Repackage the application in a file named App.sfpkg.
- C. Create a new Service Fabric cluster.
- D. Copy AppPackage.zip to a blob storage account.

Correct Answer: B

QUESTION 4

DRAG DROP

You have an Azure subscription that contains a storage account. You have an on-premises server named Server1 that runs Window Server 2016.

Server1 has 2 TB of data;

You need to transfer the data to the storage account by using the Azure Import/Export service.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order. NOTE: More than one order of answer choices is correct. You will receive credit for

any of the correct orders you select.

Select and Place:

Actions

- From the Azure portal, create an import job.
- From Server1, run waimportexport.exe.
- Attach an external disk to Server1.
- From the Azure portal, update the import job.
- Detach the external disks from Server1 and ship the disks to an Azure data center.

Answer Area

Correct Answer:

Actions

- From the Azure portal, create an import job.
- From Server1, run `waimportexport.exe`.
- Attach an external disk to Server1.
- From the Azure portal, update the import job.
- Detach the external disks from Server1 and ship the disks to an Azure data center.

Answer Area

- Attach an external disk to Server1.
- From Server1, run `waimportexport.exe`.
- From the Azure portal, update the import job.
- Detach the external disks from Server1 and ship the disks to an Azure data center.
- From the Azure portal, update the import job.

QUESTION 5

You need to recommend a backup solution for the data store of the payment processing. What should you include in the recommendation?

- A. Microsoft System Center Data Protection Manager (DPM)
- B. long-term retention
- C. a Recovery Services vault
- D. Azure Backup Server

Correct Answer: C

<https://docs.microsoft.com/en-us/azure/sql-database/sql-database-long-term-backup-retention-configure>
