Answer Area

The performance of the operating system disk [answer choice]

- will decrease over time
- will increase over time
- is guaranteed to remain the same

Vm1 will use [answer choice] for data protection.

- dm-crypt
- secure enclaves
- secure shell (SSH)

Box 1: is guaranteed to remain the same

OS disk type: Premium SSD

Premium SSD Managed Disks are high performance Solid State Drive (SSD) based Storage designed to support I/O intensive workloads with significantly high throughput and low latency. With Premium SSD Managed Disks, you can provision a persistent disk and configure its size and performance characteristics.

Box 2: secure enclaves

Virtual machine size: Standard_DC2s

DC-series virtual machines are a new family of VMs to protect the confidentiality and integrity of your data and code while it's processed in Azure through the use of secure enclaves.

Incorrect:

Not dm-crypt: Azure Disk Encryption helps protect and safeguard your data to meet your organizational security and compliance commitments. It uses the BitLocker feature of Windows and the DM-Crypt feature of Linux to provide volume

encryption for the OS and data disks of Azure virtual machines (VMs).
