### QUESTION 1

You have an Azure Stack Hub integrated system.

The retention period for storage accounts is set to 10 days.

In a user subscription, a user deletes a virtual machine that has four 500-GB unmanaged disks attached.

How will the storage be reclaimed?

- A. The deleted storage can be reclaimed immediately by using the administrator portal.
- B. The deleted storage can be reclaimed immediately by using the user portal.
- C. The deleted storage can be reclaimed only after 10 days.
- D. The deleted storage will be reclaimed automatically in 10 hours.

Correct Answer: A

### QUESTION 2

#### HOTSPOT

You need to identify the authentication and authorization process for the integrated system in Chicago. The solution must meet the technical requirements.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

#### Answer Area

To configure authentication, create:

<input type="checkbox"/>	An AD FS claims provider trust
<input type="checkbox"/>	An AD FS relying party trust
<input type="checkbox"/>	An Azure AD service principal

To configure authorization, use:

<input type="checkbox"/>	An Active Directory user account that has read access to Active Directory
<input type="checkbox"/>	An Azure AD service principal that has read access to Azure AD
<input type="checkbox"/>	An Azure AD user account that has read access to Azure AD

Correct Answer:

**Answer Area**

To configure authentication, create:

	▼
An AD FS claims provider trust	
An AD FS relying party trust	
An Azure AD service principal	

To configure authorizaion, use:

	▼
An Active Directory user account that has read access to Active Directory	
An Azure AD service principal that has read access to Azure AD	
An Azure AD user account that has read access to Azure AD

**QUESTION 3**

DRAG DROP

You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) identity provider.

You have a group named AppGroup1.

You need to provide an application with the ability to access Azure Stack Hub resources by using AppGroup1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

- Sign in to the Azure portal
- Connect to the administrator portal
- Add a certificate to an Azure key vault
- Create an app registration
- Generate a client secret
- Create a managed identify
- Add the app to a group

**Answer Area**

Navigation icons: a right arrow (>) and a left arrow (<) are positioned between the Actions and Answer Area columns. On the right side of the Answer Area, there are two circular arrows: an upward arrow (^) and a downward arrow (v).

Correct Answer:

**Actions**

- 
- 
- 
- 
- 
- 
- 

**Answer Area**

- 
- 
- 
-

**QUESTION 4**

**DRAG DROP**

You have an Azure Stack Hub integrated system. The current VIP pool uses a subnet of 192.168.203.0/24 and has routing configured to use BGP.

In the administrator portal, you receive an alert that the public IP addresses are at 95 percent utilization.

You need to add 192.168.204.0/24 to the public IP address pool.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

**Answer Area**

Connect to the privileged endpoint (PEP).

From the Resource providers blade, select **Network**, and then view the Public IP pools usage tile.

Run the `New-NetIPAddress -IPAddress 192.168.204.0 -PrefixLength 24` command.

Run the `Add-AzSVPNConnection - ServerAddress 192.168.204.0` command.

Select **Add IP pool** and enter **192.168.204.0/24** as the new IP pool.

Connect to the administrator portal.

Correct Answer:

**Actions**

**Answer Area**

Connect to the privileged endpoint (PEP).

Connect to the administrator portal.

Run the `New-NetIPAddress -IPAddress 192.168.204.0 -PrefixLength 24` command.

From the Resource providers blade, select **Network**, and then view the Public IP pools usage tile.

Run the `Add-AzSVPNConnection - ServerAddress 192.168.204.0` command.

Select **Add IP pool** and enter **192.168.204.0/24** as the new IP pool.

**QUESTION 5**

You have an Azure Stack Hub integrated system.

The security department at your company wants a list of all the users who can manage the integrated system from the

privileged endpoint (PEP).

You need to create the list.

Solution: You connect to the administrator portal and view the users who are assigned the Owner role for the default provider subscription.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
