QUESTION 1

You have three Azure virtual machines named VM1, VM2, and VM3 that host a multitier application. You plan to implement Azure Site Recovery.

You need to ensure that VM1, VM2, and VM3 fail over as a group. What should you configure?

- A. an availability zone
- B. a recovery plan
- C. an availability set

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/azure/site-recovery/site-recovery-overview>

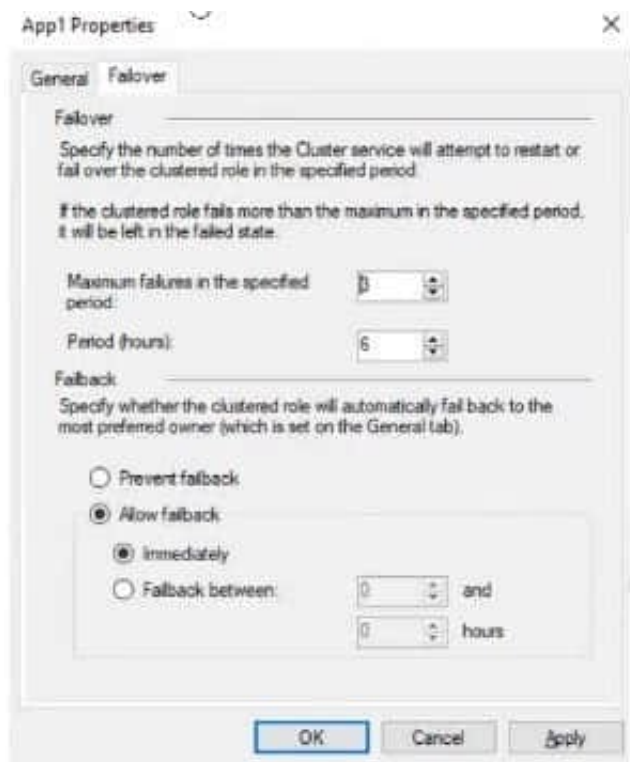

QUESTION 2

You have a failover cluster named Cluster1 that hosts an application named App1.

The General tab in App1 Properties is shown in the General exhibit. (Click the General tab.)

The Failover tab in App1 Properties is shown in the Failover exhibit. (Click the Failover tab.)

Server1 shuts down unexpectedly.

You need to ensure that when you start Server1, App1 continues to run on Server2.

Solution: You increase Maximum failures in the specified period for the App1 cluster role.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

The Maximum failures setting is used to determine when the cluster determines that a node is offline. It does not affect whether a cluster will fail back when a node comes online.

QUESTION 3

DRAG DROP You need to create a Hyper-V hyper-converged cluster that stores virtual machines by using Storage Spaces. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Enable Storage Spaces Direct.	
Add a Scale-Out File Server for application role.	
Create a Distributed File System (DFS) namespace.	
Create a failover cluster.	
Create a file share.	
Create a volume.	

Correct Answer:

Actions	Answer Area
	Create a failover cluster.
Add a Scale-Out File Server for application role.	Enable Storage Spaces Direct.
Create a Distributed File System (DFS) namespace.	Create a volume.
Create a file share.	

QUESTION 4

You have an on-premises server named Served that runs Windows Server. You have an Azure subscription. You plan to back up the files and folders on Server1 to Azure by using Azure Backup. You need to define how long the backups will be retained. What should you use to configure the retention?

- A. Backup center
- B. Windows Server Backup
- C. the Microsoft Azure Recovery Services (MARS) agent
- D. a Recovery Services vault

Correct Answer: B

QUESTION 5

HOTSPOT

With which servers can Server1 and Server3 communicate? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Server1 can communicate with:

▼

Server2 only

Server3 only

Server2 and Server3 only

Server2, Server3, and Server4

None of the servers

Server3 can communicate with:

▼

Server2 only

Server1 and Server2 only

Server1 and Server4 only

Server1, Server2, and Server4

None of the servers

Correct Answer:

Answer Area

Server1 can communicate with:

▼

Server2 only

Server3 only

Server2 and Server3 only

Server2, Server3, and Server4

None of the servers

Server3 can communicate with:

▼

Server2 only

Server1 and Server2 only

Server1 and Server4 only

Server1, Server2, and Server4

None of the servers
