QUESTION 1

You have an Azure virtual machine named VM1.

You enable Microsoft Defender SmartScreen on VM1.

You need to ensure that the SmartScreen messages displayed to users are logged.

What should you do?

- A. From a command prompt, run WinRM quickconfig.
- B. From the local Group Policy, modify the Advanced Audit Policy Configuration settings.
- C. From Event Viewer, enable the Debug log.
- D. From the Windows Security app, configure the Virus and threat protection settings.

Correct Answer: C

QUESTION 2

HOTSPOT

You are planning the www.fabrikam.com website migration to support the Azure migration plan.

How should you configure WebApp1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

To enable WebApp1 to handle requests for the website:

| | |
|--------------------------|----------------------------|
| <input type="checkbox"/> | Add a custom domain name. |
| <input type="checkbox"/> | Create a deployment slot. |
| <input type="checkbox"/> | Create a private endpoint. |

To point client connections to WebApp1:

| | |
|--------------------------|---|
| <input type="checkbox"/> | Add HTTP redirect rules on WEB1 and WEB2. |
| <input type="checkbox"/> | Implement Azure Front Door. |
| <input type="checkbox"/> | Implement Azure Traffic Manager. |
| <input type="checkbox"/> | Modify a DNS record. |

Correct Answer:

**Answer Area**

To enable WebApp1 to handle requests for the website:

Add a custom domain name.
Create a deployment slot.
Create a private endpoint.

To point client connections to WebApp1:

Add HTTP redirect rules on WEB1 and WEB2.
Implement Azure Front Door.
Implement Azure Traffic Manager.
Modify a DNS record.

Box 1: Add a custom domain name

To migrate www.fabrikam.com website to an Azure App Service web app, you need to add Fabrikam.com as a custom domain in Azure. This will make the domain name available to use in the web app.

Box 2: Modify a DNS record

You need to change the DNS record for www.fabrikam.com to point to the Azure web app.

HTTP redirect rules won't work because WEB1 and WEB2 will be decommissioned.

QUESTION 3**DRAG DROP**

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains a failover cluster named Cluster1.

You need to configure Cluster-Aware Updating (CAU) on the cluster by using Windows Admin Center (WAC).

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Add a WAC gateway.

Add the Cluster-Aware Updating role.

Add a group managed service account (gMSA).

Add Cluster1 to WAC.

Enable CredSSP.

Answer Area

Correct Answer:

Actions

Add a WAC gateway.

Add a group managed service account (gMSA).

Answer Area

Add Cluster1 to WAC.

Enable CredSSP.

Add the Cluster-Aware Updating role.

QUESTION 4

HOTSPOT

You have an on-premises server that runs Windows Server and contains a folder named Folder1. Folder1 contains 50 GB of files.

You have an Azure subscription that contains an Azure Files share named share1.

You need to migrate the data in Folder1 to share1.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Deploy to Azure:

| |
|---------------------------------|
| |
| ArcBox |
| An Azure Migrate project |
| An on-premises data gateway |
| An Azure Storage account |
| A Storage Sync Service instance |

Install on Server1:

| |
|-----------------------------------|
| |
| The Azure Connected Machine agent |
| The Azure File Sync agent |
| Storage Migration Service |
| Storage Replica |

Correct Answer:

**Deploy to Azure:**

| |
|---------------------------------|
| |
| ArcBox |
| An Azure Migrate project |
| An on-premises data gateway |
| An Azure Storage account |
| A Storage Sync Service instance |

Install on Server1:

| |
|-----------------------------------|
| |
| The Azure Connected Machine agent |
| The Azure File Sync agent |
| Storage Migration Service |
| Storage Replica |

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an on-premises server named Server1 that runs Windows Server.

You have a Microsoft Sentinel instance.

You add the Windows Firewall data connector in Microsoft Sentinel.

You need to ensure that Microsoft Sentinel can collect Windows Firewall logs from Server1.

Solution: You install the Log Analytics agent on Server1

Does this meet the goal?

A. Yes

B. No

Correct Answer: A
