QUESTION 1

You have an on-premises network and an Azure virtual network.

You establish a Site-to-Site VPN connection from the on-premises network to the Azure virtual network, but the connection frequently disconnects.

You need to debug the IPsec tunnel from Azure.

Which Azure VPN Gateway diagnostic log should you review?

- A. GatewayDiagnosticLog
- B. RouteDiagnosticLog
- C. IKEDiagnosticLog
- D. TunnelDiagnosticLog

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/azure/vpn-gateway/troubleshoot-vpn-with-azure-diagnostics>

QUESTION 2

You have two Azure virtual networks named Vnet1 and Vnet2.

You have a Windows 10 device named Client1 that connects to Vnet1 by using a Point-to-Site (P2S) IKEv2 VPN.

You implement virtual network peering between Vnet1 and Vnet2. Vnet1 allows gateway transit Vnet2 can use the remote gateway.

You discover that Client1 cannot communicate with Vnet2.

You need to ensure that Client1 can communicate with Vnet2.

Solution: You enable BGP on the gateway of Vnet1.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

You need to use a comma-separated value (CSV) file to import server inventory to Azure Migrate. Which fields are

mandatory for each entry in the CSV file?

- A. Server name, Cores, OS Name, and Memory (in MB)
- B. Server name, IP addresses, Disk 1 size (in GB), and CPU utilization percentage
- C. Server name, IP addresses, OS version, and Number of disks

Correct Answer: A

The following table summarizes the file fields to fill in: Reference: <https://docs.microsoft.com/en-us/azure/migrate/tutorial-discover-import>

Field name	Mandatory	Details
Server name	Yes	We recommend specifying the fully qualified domain name (FQDN).
IP address	No	Server address.
Cores	Yes	Number of processor cores allocated to the server.
Memory	Yes	Total RAM, in MB, allocated to the server.
OS name	Yes	Server operating system. Operating system names that match or contain the names in this list are recognized by the assessment.
OS version	No	Server operating system version.

QUESTION 4

HOTSPOT

You have a server named Server1 that runs Windows Server.

On Server1, you create a Data Collector Set named CollectorSet1 based on the Basic template.

You need to configure CollectorSet1 to meet the following requirements:

1.

Older performance counter logs must be overwritten by new ones.

2.

Performance counter logging must stop if there is less than 500 MB of free disk space.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area	
Older performance counter logs must be overwritten by new ones:	<div><div></div><div>The Configuration properties</div><div>The Data Manager properties</div><div>The Performance Counter properties</div></div>
Performance counter logging must stop if there is less than 500 MB of free disk space:	<div><div></div><div>The Configuration properties</div><div>The Data Manager properties</div><div>The Performance Counter properties</div></div>

Correct Answer:

Answer Area	
Older performance counter logs must be overwritten by new ones:	<div><div></div><div>The Configuration properties</div><div>The Data Manager properties</div><div>The Performance Counter properties</div></div>
Performance counter logging must stop if there is less than 500 MB of free disk space:	<div><div></div><div>The Configuration properties</div><div>The Data Manager properties</div><div>The Performance Counter properties</div></div>

QUESTION 5

HOTSPOT

You are planning the migration of APP3 and APP4 to support the Azure migration plan.

What should you do on Cluster1 and in Azure before you perform the migration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

On Cluster1:

- Configure Azure Network Adapter.
- Create a Point-to-Site (P2S) VPN connection to Vnet1.
- Import the Azure Migrate appliance.
- Install the Azure File Sync agent.
- Install the Windows Server Migration Tools.

In Azure:

- Create a premium block blobs Azure Storage account.
- Create a private endpoint.
- Create a VPN gateway.
- Create an Azure Migrate project.

Correct Answer:

Answer Area

On Cluster1:

- Configure Azure Network Adapter.
- Create a Point-to-Site (P2S) VPN connection to Vnet1.
- Import the Azure Migrate appliance.
- Install the Azure File Sync agent.
- Install the Windows Server Migration Tools.

In Azure:

- Create a premium block blobs Azure Storage account.
- Create a private endpoint.
- Create a VPN gateway.
- Create an Azure Migrate project.
