QUESTION 1

While validating a LINK Cartridge for inclusion into the solution, an Architect notices that the UNK cartridge documentation requires the Architect to add a script node to a Pipeline in the storefrontcartridge. The script is also a valid CommonJS module.

Which approach can the Architect use to Integrate this cartridge into a site that uses Controllers only?

- A. Copy and paste the script that is required directly into the Controller, add the appropriate arguments, then execute the correct method
- B. Add the script that is required via a require statement in the Controller, add the appropriate arguments, and execute the correct method.
- C. Add the script that is required via a Module, exports statement in the Controller add the appropriate arguments, and execute the correct method.
- D. Add the script that is required via an import\$script statement in the Controller, add the appropriate arguments, and execute the correct method.

Correct Answer: B

QUESTION 2

Which two activities should an Architect encourage the replication team to follow based on S2C Commerce best practices? Choose 2 answers

- A. Use the undo replication process to roll back to the previous replication if necessary.
- B. Replicate the latest data to Production during periods of increased site use to ensure freshness.
- C. Use the undo replication process to roll back code replications only, not data replications.
- D. Wait 15 minutes after the recreation process completes for the cache to clear automatically.

Correct Answer: CD

QUESTION 3

The Client has just acquired a new brand and wants to integrate the new brand's current e-commerce site into a current realm as a new site. The acquisition has its own Enterprise Resource Planning (ERP) system for product data and inventory. The new site will use the existing realm's Order Management System (OMS) and Customer Relationship Management (CRM) system.

What two requirements does the Architect need to keep in mind when creating the technical specification document? Choose 2 answers

- A. A new customer export Job must be created to export customers.

- B. A new product Import Job must be created to manage products.
- C. A new inventory Import Job must be created to manage inventory.
- D. A new order export job must be created to export orders.

Correct Answer: BC

QUESTION 4

An Architect is documenting the technical design for a single B2C Commerce storefront. The Client has a business requirement to provide pricing that is customized to specific groups:

1.
50 different pricing groups of customers
2.
30 different pricing groups of employees
3.
10 different pricing groups of vendors

Which items should the Architect include in the design in order to set applicable price books based on these requirements\ \ \

- Choose 2 answers A.
1. 50 customer groups for customers
 2.
30 customer groups for employees
 3.
10 customer groups for vendors
- B.
1. One customer group and SO subgroups for customers
 2.
One customer group and 30 subgroups for employees
 3.
Onecustomer group and 10 subgroups for vendors
- C. One campaign and multiple promotions for each customer group
- D.
1. One promotion and 50 campaigns for customers
 - 2.

One promotion and 30 campaigns for employees

3.

One promotion and 10 campaigns for vendors

Correct Answer: AB

QUESTION 5

A B2C Commerce Developer has just finished implementing a new promotion code form on checkout. During review, an Architect notes that the form is not using CSRF validation correctly.

```
<form action="{URLUtils.continueURL()}" method="GET">
  <!-- ... the form input elements ... -->
  <input type="hidden"
    name="{dw.web.CSRFProtection.getTokenName()}"
    value="{dw.web.CSRFProtection.generateToken()}" />
  <input type="submit" value="Apply Promotion Code" />
</form>

formResult = cartForm.handleAction({
  'addPromoCode': function (formgroup) {
    var CSRFProtection = require('dw/web/CSRFProtection');

    var status;
    var result = {
      cart: cart,
      EnableCheckout: true,
      dontRedirect: true
    };
    status = cart.addCoupon(formgroup.couponCode.htmlValue);
    /* ... some error handling code, based on the returned status ... */
    return result;
  }
});
```

Which two options are best practice recommendations for dealing with CSRF validation? Choose 2 answers

- A. Ensure the CSRF protection is validated on form submission.
- B. Only use GET methods over HTTPS.
- C. Automatically renew the CSRF Token if expired.
- D. Only use POST methods over HTTPS.

Correct Answer: AD
