QUESTION 1

A developer is implementing new Page Designer content on a merchant's Storefront and adds the line below to the setupContentSearch function in the searchHelpers.js file.

```
apiContentSearchModel.setFilteredByFolder(false);
```

What does this achieve?

- A. Enables searching to find Page Designer content assets that are not in folders.
- B. Prevents Page Designer pages and components from being searchable.
- C. Extends the ContentSearchModel to allow the folder filter.
- D. Filters Page Designer search results into separate page and component folders.

Correct Answer: A

QUESTION 2

Below is a form definition snippet from the newsletter.xml file.

```
<?xml version="1.0"?>  
<form xmlns="http://www.demandware.com/xml/form/2008-04-19">  
  <field formid="email" lable="Email:" type="string" mandatory="true" max-length="50" />  
</form>
```

Which line of code creates a JSON object to contain the form data?

- A. server.form.getForm(^ dwfrm_newsletter\\)
- B. server.forms.getForm(^ newsletter\\)
- C. server.form.getForm(^ newsletter\\)
- D. server.forms.getForm(^ dwfrm_newsletter\\)

Correct Answer: B

QUESTION 3

Which three configurations does a developer need to ensure to have a new product visible in the Storefront? (Choose three.)

- A. The Storefront catalog that contains the product is assigned to a site
- B. The product has a price

- C. The product has a master product
- D. The product is online and searchable
- E. The search index is built

Correct Answer: ABC

QUESTION 4

A client has two B2C Commerce sites in the same instance: one for the U.S. market, the other for the European market. The product they make are sold with different safety certificates based on the world location.

For example, they sell a smartphone with certificate A in the U.S. and certificate B in Europe, a hairdryer with certificate C in the U.S. and certificate D in Europe, and more.

How should a developer allow the merchant to display the appropriate certification logo in the product details page, depending on the customer's location?

- A. Add a Localizable custom preference to the SitePreference system object type.
- B. Add a Site-specific custom attribute to the Product system object type.
- C. Add a Localizable custom attribute to the Certificate system object type.
- D. Add an Image custom preference to the SitePreference system object type.

Correct Answer: A

QUESTION 5

To ensure SFRA best practices and protect against request forgery, the developer introduced CSRF token generation in the customer address form.

```
<form ... action="submit">
  <input name="$ (dw.web.CSRFProtection.getTokenName ())"
    value="$ {dw.web.CSRFProtection.generateToken ()}"
  ...
  <the rest of the Form Fields>
  ...
</form>
```

To implement CSRF protection when the form is submitted, the developer needs to introduce the CSRF validation using one or both of these methods as applicable:

1.

validateRequest

2.

validateAjaxRequest

Where in the code does the developer need to add this CSRF validation check?

- A. In the middleware chain of the controller post route
- B. In the controller function that displays the form
- C. In the model function that persists the form data
- D. In the view function that handles the submitted form

Correct Answer: A
