**QUESTION 1**

The behavior analyst has had good results with an intervention she designed that makes access to video games contingent upon playing with other children. She now wants to compare the effects of differing amounts of video game access time. She should conduct a

- A. changing criterion study.
- B. nonparametric study.
- C. parametric study.
- D. reversal study.

Correct Answer: C

---

**QUESTION 2**

In self-control, where does the ultimate control lie? (Or, why is self-control a misnomer?)

- A. With the self
- B. The choice of the person
- C. In the environment
- D. With a contract manager

Correct Answer: C

---

**QUESTION 3**

Holly is learning to use a spoon to feed herself. Applesauce is known to function as a reinforcer. Her teacher has selected the following objective for Holly: "Given a spoon and a 3-ounce dish of applesauce, Holly will independently scoop the applesauce to her mouth." This objective is incomplete. Which component is missing?

- A. antecedent stimulus
- B. consequence condition
- C. prerequisite skill criteria
- D. standard of performance

Correct Answer: D

---

**QUESTION 4**

Jimmy is watching his favorite Saturday morning cartoon and playing with his train set. The cat walks past

him and he pulls its tail. Jimmy's mother takes away one of his train cars.

This is an example of.

- A. response intervention.
- B. antecedent manipulation.
- C. response cost.
- D. overcorrection.

Correct Answer: C

---
