QUESTION 3

When migrating to MQv9, what are the MQ migration model options to consider?

- A. Cross stage migration
- B. Single stage migration and cross stage migration
- C. Multi-stage migration, side-by-side migration, and single stage migration

D. Plexed stage migration, side-by-side migration, and cross stage migration

Correct Answer: C

QUESTION 4

An application is being implemented that required a connection to an MQ queue manager. Where can the queue manager be located relative to the application to achieve this?

- A. It can be either local or remote.
- B. It must be local to the application.
- C. It must be remote from the application.
- D. It can be either local or remote, but must use a requester channel for connection.

Correct Answer: A

QUESTION 5

A business application has been removed from the mqm group but still has privileged authority through OAM access grants. The MQ administrator must delete the authorizations that grant administrative access to the queue manager while retaining those that do not.

Which access grant should the administrator retain?

- A. +crt on Queues
- B. +all on the Command Queue
- C. +chg on the Queue Manager
- D. +setall on the Default Model queue

Correct Answer: D
