QUESTION 1

According to the IBM Cloud Garage Method, what is the purpose of Stress Testing performance tests?

- A. They determine or validate the performance characteristics of the system or application under test when it is subjected to conditions beyond what is anticipated during production operations.
- B. They determine or validate the performance characteristics of a system or application under test by subjecting it to the types of workloads and load volumes that are anticipated during production operations.
- C. They test potential loads that the systems might encounter when the network comes under stress.
- D. They test potential loads that the systems might encounter when backing services experience latency.

Correct Answer: A

QUESTION 2

A Node.js application needs to be deployed first on a staging environment to be tested before it is deployed to production environment . Using the Delivery Pipeline, two Deploy stages were created, one called "DeployToStag" targeting staging environment and the other called "DeployToProd" targeting production environment.

On running the DeployToStag stage it ran successfully while on running the DeployToProd stage it failed with the following error:

"The route myapp.mybluemix.net is already in use"

Which command in the Deploy script for the DeployToProd stage can fix the error?

A. Option

```
cf push "${CF_APP}"
```

B. Option

```
cf push "${CF_APP}" --no-manifest
```

C. Option

```
cf push "${CF_APP}" -h my-prod-app
```

D. Option

```
cf push "${CF_APP}" --random-route
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: D

QUESTION 3

In IBM Cloud Kubernetes Service, what is used to declare all of the components of an application and its dependencies?

A. Module

B. Node

C. Replica

D. Deployment

Correct Answer: D

QUESTION 4

What is the goal of continuous release and deployment?

A. To constantly develop new features

B. To keep test and production environment in sync

C. To release new features to customers and users as soon as possible

D. For developers to regularly integrate their work with that of the rest of the developers on their team

Correct Answer: D

QUESTION 5

Which statement is true regarding microservices?

A. They are scaled as a group when greater performance is needed

B. They are an architecture style based on loosely coupled applications

C. They are able to overlap responsibilities to provide better availability

D. They are designed with a focus on combining unrelated tasks in one process

Correct Answer: B
