### QUESTION 1

The Web API provides operations that enable client applications to achieve which functionality?

- A. Query Coaches
- B. Search personal data
- C. Manage internal activities
- D. Query process instances and tasks

Correct Answer: C

---

### QUESTION 2

A developer is working on a client side human service that is being used as a task for a process. A Service Flow is integrated to update the client side human service variables with latest server values in the process instance variables.

What implementation should the developer follow to achieve this outcome?

- A. In the implementation behavior of service flow, enable `Map input data automatically`.
- B. Add javascript code to update client side human service variables in pre and post execution scripts of integrated service flow.
- C. In the implementation behavior of service flow, set Work with the process instance variables to `Refresh the instance variables`.
- D. In the implementation behavior of service flow, set Work with the process instance variables to `Send variable updates to the instance`.

Correct Answer: D

---

### QUESTION 3

How can process applications be enabled to create, update, or download ECM documents?

- A. Use an external ECM server instead of the internal IBM BPM document store.
- B. Select `Always use this connection information` properties of the ECM server definition.
- C. Use the Document List or Document Viewer coach views to create, update, or download the documents.
- D. Add the `enable-document-authorization-security-service` configuration setting to the 100Custom.xml.

Correct Answer: B

---

#### QUESTION 4

When creating an External Service, how can a REST service be discovered?

- A. From an imported .ear file
- B. From a UDDI Service call
- C. From a local WSDL specification file
- D. From a local OpenAPI2.0 specification file

Correct Answer: C

---

#### QUESTION 5

The IBM embedded document store should be considered based on which business requirement?

- A. Document is not accessed during the process
- B. Coaches should be able to display the documents
- C. Lifecycle of the document needs to be tied to the process
- D. Documents need to be retained long after the process instances are deleted

Correct Answer: C
