QUESTION 1

How can a developer improve the load times and performance of a table built with BPM UI controls?

A. Place the table in a Modal Section.

B. Place the table in a Response Sensor layout.

C. Change the columns\' "renderAs" setting to \'Simple HTML\' wherever feasible.

D. Replace the implementation to use a repeating layout instead of a table implementation.

Correct Answer: A

QUESTION 2

A developer receives the following requirement request when configuring documents and folders for an IBM BPM process:

1.

 Create the ECM folder structure automatically from IBM BPM

2.

 Change the Root Process Folder to be managed by the ECM System

3.

 Create a folder structure that has some BPM managed documents and folder along with some ECM managed documents and folders

What is an appropriate response to this request?

A. All requirements are feasible.

B. Only requirement 3 is feasible.

C. Only requirement 1 is feasible.

D. Requirements 1 and 3 are feasible, but 2 is not.

Correct Answer: B

QUESTION 3

Which team is eligible for being invited to collaborate with other users on a task?

A. Admin team

B. Support team

C. Experienced team

D. Task experts team

Correct Answer: A

QUESTION 4

How can process applications be enabled to create, update, or download ECM documents?

A. Use an external ECM server instead of the internal IBM BPM document store.

B. Select \\'Always use this connection information\\' properties of the ECM server definition.

C. Use the Document List or Document Viewer coach views to create, update, or download the documents.

D. Add the \\'enable-document-authorization-security-service\\' configuration setting to the 100Custom.xml.

Correct Answer: B

QUESTION 5

Which statement is true about working with system data toolkits?

A. The system data toolkit includes many predefined variable types.

B. Administrative access is required to edit the library items in a system data toolkit.

C. When a new process application is created, the system data toolkit needs to be added as a dependency.

D. Adding a dependency on the system data toolkit allows the creation of custom, localized dashboards with the reusable interface elements.

Correct Answer: C
