QUESTION 1

What is a valid reason why a development team might consider designing a process application with an externalized UI?

- A. The IBM BPM UI toolkit does not work on mobile devices.
- B. IBM BPM does not provide a UI framework that works with integrated systems.
- C. The IBM BPM UI framework requires an additional software purchase in addition to IBM BPM.
- D. An organization might need to embed task list and human activity into existing systems instead of using the IBM BPM UI framework.

Correct Answer: D

QUESTION 2

In IBM BPM, what needs to be done to use an external service in a Service Flow?

- A. Use a Modify Task activity type to invoke an operation of the external service
- B. Use a Service Task activity type to invoke an operation of the external service
- C. Use a Decision activity type to invoke the rules of an external service
- D. Use a Content Integration Task activity type to invoke an operation of the external service

Correct Answer: C

QUESTION 3

A developer is working on a client side human service that is being used as a task for a process. A Service Flow is integrated to update the client side human service variables with latest server values in the process instance variables.

What implementation should the developer follow to achieve this outcome?

- A. In the implementation behavior of service flow, enable `Map input data automatically`.
- B. Add javascript code to update client side human service variables in pre and post execution scripts of integrated service flow.
- C. In the implementation behavior of service flow, set Work with the process instance variables to `Refresh the instance variables`.
- D. In the implementation behavior of service flow, set Work with the process instance variables to `Send variable updates to the instance`.

Correct Answer: D

QUESTION 4

Which two coach views can a developer use to show a list of ECM documents on a Coach?

- A. BPM File List
- B. ECM File Uploader
- C. Document Explorer
- D. BPM Document List
- E. ECM Document List

Correct Answer: AE

QUESTION 5

What is the definition of the `Item` type shown in the diagram below?

- A. It must be completed by process participants
- B. It uses JavaScript to access and manipulate data
- C. It must be completed by an automated system or service
- D. It uses JavaScript APIs to evaluate a condition in a business rule

Correct Answer: D
