QUESTION 4

An administrator is tasked to reduce data volumes in the asset database and reduce stale data contributing to asset growth deviation.

How can the administrator tune the configuration of the Asset Profiler?

A. In the System Configuration section of the Admin, access the Asset Profile Configuration and reduce the retention values for the Asset Profiler Retention Configuration and Save. Next, deploy the changes into the environment for the updates to take effect.

B. In the System Configuration section of the Admin, access the Asset Profile Configuration and increase the retention values for the Asset Profiler Retention Configuration and Save. Next, deploy the changes into the environment for the updates to take effect.

C. On the navigation menu, click Admin, click the Asset Profile Configuration and reduce the retention values for the Asset Profiler Retention Configuration and Save. On the navigation menu, click Admin and from the Advanced menu, click Restart Event Collection Services. Next, deploy the changes into the environment for the updates to take effect.

D. In the System Configuration section of the Admin, access the Asset Profile Configuration and increase the retention values for the Asset Profiler Retention Configuration and Save. On the navigation menu, click Admin and from the Advanced menu, click Restart Event Collection Services. Next, deploy the changes into the environment for the updates to take effect.

Correct Answer: B
