QUESTION 2

Which one is the most appropriate use case for artificial intelligence (AI)?

- A. detecting objects in video streams
- B. compressing large video files
- C. aggregating sales revenue per state
- D. creating a pivot table with monthly costs

Correct Answer: C

QUESTION 3

Which two statements are correct about deploying machine learning models? (Choose two.)

- A. It allows integration within business applications.
- B. It makes it possible to create reports for management dynamically using specific parameters from executives.
- C. It is critical for achieving high accuracy in training.
- D. It is a necessary step in training and evaluating the performance of the models.
- E. It is only possible on the cloud because they require a large amount of compute resources.

Correct Answer: CD

QUESTION 4

In machine vision, the algorithm for detecting objects or features in an image based on a target pattern is known as?

- A. OCR
- B. Hough transformation
- C. Fourier transform
- D. normalized correlation

Correct Answer: D

QUESTION 5

The least squares optimization technique (The Method of Least Squares) is used in which algorithm?

- A. Support Vector Machines
- B. Naive Bayes classification
- C. Logistic regression
- D. Linear regression

Correct Answer: D
