QUESTION 1

A Conditional format may be set on a List object in a report, generated and processed but is hidden from view?

- A. Show/Hide Variable
- B. Hidden Variable
- C. Render Variable
- D. Style Variable

Correct Answer: C

QUESTION 2

A developer has nested two non-measures in a Column visualization in a dashboard. How would the developer manually order the columns to get the column order to show properly?

- A. Use automatic sorting.
- B. Uncheck sort automatically, and drag the columns to the correct order.
- C. Select Sort remaining items by Auto.
- D. Use custom sorting.

Correct Answer: D

QUESTION 3

A user complains that the table they're using within a data module has too much historical data in it. The user would like to keep the old data available, but when using the table for any new reports would like to see only newer entries based

on an 'Order Date' column.

What does the developer need to do to accomplish this?

- A. Create a navigation path for the newer entries.
- B. Apply a filter to the 'Order Date' attribute.
- C. Create a calculated 'Order Date'.
- D. Create a copy of the table, and apply a filter to the 'Order Date' attribute.

Correct Answer: A

QUESTION 4

When selecting the Layout positioning property for a dashboard, which is the correct option for dashboards that will be presented on different mobile devices?

- A. Unbounded
- B. Relative
- C. Conditional
- D. Absolute

Correct Answer: C

QUESTION 5

Which statement is true regarding Custom Sorts in dashboards?

- A. A user can create a custom sort on any type of data.
- B. Custom sorts cannot be created on measures.
- C. Custom sorts may only be created in a Data Module.
- D. Custom sorts may be created by selecting a field in the source pane and going to properties.

Correct Answer: B
