QUESTION 2

Which statement describes the IBM Cloud Pak for Integration?

A. It helps deploy on your choice of clouds, with low-code tools for business users and real-time performance visibility for business managers. Customers can migrate their runtimes without application changes or data migration, and automate at scale without vendor lock-in.

B. It helps to uncover hidden threats, make informed decisions about the risks they pose, then respond faster to those threats ?while leaving data where it is. Customers can integrate tools and connect workflows across hybrid, multicloud environments, using a platform that runs anywhere.

C. It helps support the speed, flexibility, security and scale required for all of your digital integration transformation initiatives, and comes pre-integrated with a set of capabilities including API lifecycle, application and data integration, messaging and events, high speed transfer and security.

D. It helps to provide consistent visibility, automation, and governance across a range of hybrid and multicloud capabilities such as event management, infrastructure management, application management, multicluster management, edge management and integration with existing tools and processes.

Correct Answer: D
