QUESTION 2

Which statement describes the IBM Cloud Pak for Multicloud Management?

A. It helps deploy on your choice of clouds, with low-code tools for business users and real-time performance visibility for business managers. Customers can migrate their runtimes without application changes or data migration, and automate at scale without vendor lock-in.

B. It helps to provide consistent visibility, automation, and governance across a range of hybrid and multi cloud capabilities such as event management, infrastructure management, application management, multi-cluster management, edge management and integration with existing tools and processes.

C. It helps to unify and simplify the collection, organization and analysis of information. Enterprises can turn data into insights through an integrated cloud-native architecture. It is extensible, easily customized to unique client information and AI landscapes through an integrated catalog of IBM, open source and third-party microservices add-ons.

D. It helps support the speed, flexibility, security and scale required for all of your digital integration transformation initiatives, and comes pre-integrated with a set of capabilities including API lifecycle, application and data integration, messaging and events, high speed transfer and security.

Correct Answer: B
