QUESTION 1

Which configuration option is INCORRECT when dealing with external availability in document specific fulfillment rules?

- A. Do not validate reservation ID externally during order line reservation creation
- B. Do not check external availability during release
- C. Do not check external availability during schedule
- D. Do not check external availability during reservation

Correct Answer: D

QUESTION 2

A custom API needs to be developed to evaluate the price of a given order. Different kinds of pricing model types, such as "REGULAR", "PROMOTION", "HOLIDAY" and "SEASONAL" are used.

Tip implementation professional wants to set this up so that the custom API code does not have to invoke an API to retrieve the pricing model type. How can this be achieved if the pricing model type that needs to be used by the custom API should be set up as a configurable parameter?

- A. Set up the different pricing models as Common Code Values under a Pricing Model Common Code type
- B. Configure the pricing model type to be used as an Argument for the custom API component under the Argument tabs
- C. Add an XSL translator component before the custom API component which will stamp the required pricing model type
- D. Add a condition component before the custom API component in the service with a condition Pricing Model equal to the relevant pricing model type

Correct Answer: C

QUESTION 3

In the out-of-the-box order fulfillment pipeline, what does the "Consolidate to shipment" transaction do?

- A. Either consolidates to existing shipment or creates a new shipment
- B. Always creates a new shipment for a Given Order release
- C. Shipment will not be created if the given order release cannot be included in an existing shipment
- D. Always finds an existing shipment into which the Release can be included

Correct Answer: B

QUESTION 4

A security company sells a basic security package for \$199, and would like to offer an optional monthly service package for \$42 per month. The basic \$199 package price should be broken down as follows:

Base Price = \$100 Activation Fee = \$99

Which step does the implementation professional need to take to allow this company to accomplish its pricing objective?

- A. Configure price rules that will enable the company to create multiple price list lines for an item, directly in Sterling Order Management
- B. Configure multiple price types for an item
- C. Split the order into multiple line items and then configure the price for each item
- D. Configure price rules that will enable the company to create multiple price list lines for an item, after integrating with third-party pricing engines

Correct Answer: B

QUESTION 5

During a Silent installation of the application, if a user does NOT want to perform any of the database operations, which setting needs to be configured?

- A. DB_DATA
- B. REINIT_DB
- C. LOAD_DEFAULTS
- D. NO_DBVERIFY

Correct Answer: B
