QUESTION 1

A retrieved property is configured to return results for relevant endpoints once every 24 hours. The last property result for a specific endpoint was six hours ago. The configuration has changed so the next time the result is returned, it will be

different than the result from six hours ago.

When will the endpoint return an updated result?

- A. As soon as the client loop has completed.
- B. In approximately 18 hours, if the endpoint is online.
- C. There will not be a new result until the retrieved property has been deactivated and reactivated.
- D. Immediately; a change in property value will cause the endpoint to upload a new result to the server.

Correct Answer: B

QUESTION 2
