QUESTION 1

End users are noticing that when they fetch data from the list view in the Maximo application using previously saved lookup criteria, the data is slow to display.

What can be done to investigate this issue?

- A. Review the saved SQL in the SQL table.
- B. Review the saved SQL in the QUERY table.
- C. Review the saved SQL in the LOOKUP table.
- D. Review the saved SQL in the DATASET table.

Correct Answer: C

QUESTION 2

A company has configured several application servers to handle specific tasks using UI cluster, Cron cluster and Integration cluster. A requirement is that certain Cron tasks do not run on the UI cluster and the Integration cluster.

What is one way to accomplish this?

- A. Add `mxe.crontask.skip=[crontask name]` to maximo properties file.
- B. Add `mxe.crontask.donotrun=[crontask name]` to maximo properties file.
- C. Add `mxe.crontask.donotrun=[crontask name]` to the `crontask.properties` file.
- D. On System Configuration -> Cron Task Setup, Select Action -> Reload Request, then uncheck "Run".

Correct Answer: D

QUESTION 3

A company wishes to provide a popup dialog on an attribute when an incorrect value is entered. The appropriate Domain has been created. The next step is to create the error message.

Where can this be done?

- A. Messages.xml
- B. Migration Manager
- C. Domains Application
- D. Database Configuration Application

Correct Answer: A

QUESTION 4
