QUESTION 1

In IBM Sametime 9.0, Sametime Community Server user login/logout data can be logged in either a text file or in an IBM Domino database.

How and where does an administrator change how user login/logout data is stored?

- A. By using a text editor to edit the notes.ini file located in the Domino server program directory
- B. By using a text editor to edit the sametime.ini file located in the Domino server program directory
- C. By using an IBM Notes client to edit the LogOutputs document in the Sametime Configuration database in the Sametime Community Server
- D. By logging in to the Sametime System Console and changing the Log Outputs box under the Community Services tab for a Sametime Community Server

Correct Answer: B

QUESTION 2

The IBM Sametime Media Manager's Video MCU component is available with which Sametime offering?

- A. Sametime Gateway
- B. Sametime Extended
- C. Sametime Conference
- D. Sametime Communicate

Correct Answer: D

QUESTION 3

Margaret has configured a Sametime Meeting Server cluster to support high availability using a load balancer at <http://meeting.renovations.com>. However, users are complaining that they are seeing different content on the sidebar in the meeting room.

How can Margaret identify the cluster member that is causing problems and resolve the issue?

- A. Configuring single sign-on between the Sametime Meeting Server nodes will allow users to see the same meeting rooms.
- B. She can restart the load balancer which will force a synchronization of the Sametime Meeting Server nodes and allow users to see the same meeting rooms.
- C. She can isolate the problem server by stopping the secondary node. This will force traffic to be redirected to the primary node where Margaret can examine its logs to see if it is the problem node.
- D. Logging directly into the Sametime Meeting Servers at either

Correct Answer: B

QUESTION 4

When tuning the IBM Sametime Media Manager, where is master copy of the stavconfig.xml file found?

- A. On the Video Manager Server
- B. On the Sametime Proxy Server
- C. On the Sametime System Console
- D. On each of the deployment managers for the Conference Manager

Correct Answer: D

QUESTION 5

If Todd needed to debug a problem on a TURN server, where would he apply the debug settings to enable the trace?

- A. TURN Server
- B. Video Manager
- C. Media Manager
- D. Sametime System Console

Correct Answer: B
