QUESTION 1

Where would an administrator configure an A/V policy to allow members of an LDAP group access to IBM Sametime A/V capabilities?

- A. In the security properties file in the installation folder
- B. In the Manage Policies section on the Sametime System Console
- C. In the Sametime Policies database on the Sametime Community Server
- D. In the Sametime Configuration database on the Sametime Community Server

Correct Answer: B

QUESTION 2

Where are the default FFDC log files located for an IBM Sametime Proxy Server that is installed on a Windows machine?

- A. C:\IBM\WebSphere\AppServer\profiles\logs
- B. C:\IBM\WebSphere\AppServer\profiles\ffdc
- C. C:\IBM\WebSphere\AppServer\profiles\logs
- D. C:\IBM\WebSphere\AppServer\profiles\logs\STProxyServer\

Correct Answer: B

QUESTION 3

How does an IBM Sametime administrator grant access to the Meeting Room Statistics link on the Meeting Room Center webpage to another user?

- A. Login to the operating system (OS) of the Meeting Server and create a new OS ID for the user which they will then use to log into the Meeting Room Center webpage.
- B. Log into the Sametime System Console and navigate to Users and Groups > Administrative User Roles, click Add, then map the Monitor role to the Sametime user's user ID.
- C. Log into the Sametime System Console and navigate to Users and Groups > Administrative User Roles, click Add, then map the Meeting Administrator role to the user's Sametime user ID.
- D. Log into the Sametime System Console and navigate to Applications > WebSphere EnterpriseApplications, select the Meeting Server Administration application, then Security role to user/ group mapping and map the user's Sametime user ID to the AdminUser role.

Correct Answer: C

QUESTION 4

On an IBM Sametime Community server running on Microsoft Windows 2008, a Sametime administrator puts an LDAP trace parameter into the sametime.ini file.

What is/are the minimum step(s) to start tracing?

- A. Reboot the entire server.
- B. Restart the IBM Domino server.
- C. Enter Tell STADDIN Quit in the Domino console.
- D. Restart the ST Users, ST Resolve and ST Directory services.

Correct Answer: A

QUESTION 5

Renovations Inc. has two IBM Sametime Community Servers configured in a clustered environment.

Why are the users being re-directed to the primary Sametime Community Server only?

- A. The secondary node is running with a lower fixpack level than the primary node.
- B. The Sametime administrator has stopped the secondary node to apply a recommended fixpack.
- C. The LTPA key on the secondary node that is being shared between the Sametime Community servers is corrupt.
- D. The Sametime administrator has given users the load balancer IP address instead of the secondary node IP address.

Correct Answer: C
