QUESTION 1

Francois would like to build an OpenSocial gadget.

Why might Francois choose to use an OpenSocial Template for his gadget?

A. OpenSocial Templates do not require well-formed XML which will save development time.

B. OpenSocial Templates allow the developer to customize the gadget to a specific device and platform.

C. OpenSocial Templates allow developers to easily build gadgets with relatively little or no JavaScript coding.

D. OpenSocial Templates have built-in optimization that improves performance and response time to the end user.

Correct Answer: B

QUESTION 2

What is the Activity Stream Data (xe:activityStreamData) datasource used for?

A. It uses a proprietary protocol for gathering IBM Connections Activity Streams.

B. Its a datasource that converts an IBM Notes View into an open format activity stream.

C. It is an open format specification for activity stream protocols which syndicate activities taken in social web application and services.

D. It is a server-side JavaScript component added to an XPage. When rendered in the browser, anXSP.activityStreams is instantiated so client-side code can make GET requests to OpenSocial services.

Correct Answer: C
