QUESTION 1

Which feature of the Theme Optimization Analyzer portlet will analyze the theme and its components for known issues and then report the number of errors, warnings and informational messages?

- A. Reports
- B. Validation Reports
- C. Development Mode
- D. Remote Debugging

Correct Answer: B

Validation reports Use the validation portlet to verify that your theme contains no errors. The validation report analyzes your theme and theme components for known issues and reports the number of errors, warnings, and informational messages. It also includes a detailed explanation about how to fix the errors that occur.

QUESTION 2

John wants to change the default behavior of IBM WebSphere Portal so that any user who authenticates by using an explicit login is redirected to a particular page.

Which option is a valid implementation of this custom behavior?

- A. Specify the URL of the page in the redirect, login, url property in the configuration service.
- B. Specify the URL of the page in the redirect .login, url property in the authentication service.
- C. Specify the URL of the page in the redirect, login, authenticated, url property in the configuration service.
- D. Specify the URL of the page in the redirect, login, authenticated, url property in the authentication service.

Correct Answer: A

QUESTION 3

Which statement is true regarding responsive web design (RWD)?
