### QUESTION 1

Assuming that the user-agent was correctly configured as a\_smartphone, what syntax in the theme module definition should be used to include a resource that is specific to this client?

- A.
- B.
- C.
- D.

Correct Answer: D

---

### QUESTION 2

Rachel needs to configure access to her company's mail system by using a portlet. The company requires users to be prompted for their user name and password the first time they access their mail. This information is then stored for future access.

What type of credential vault slot should Rachel use?

- A. system slot
- B. shared user slot
- C. portlet shared slot
- D. administrative slot

Correct Answer: C

---

### QUESTION 3

Arthur needs to clean up cached user data from an object cache in IBM WebSphere Portal after the user's session is ended.

Which areas are valid to place Arthur's cleanup logic? (Choose two.)

- A. Implicit Login Filter Chain
- B. Explicit Login Filter Chain
- C. Implicit Logout Filter Chain
- D. Explicit Logout Filter Chain
- E. Session Validation Filter Chain

Correct Answer: BE

---

#### QUESTION 4

Michele wants to redirect a user's request to a specific portal page, but only if the "validated" cookie does not exist. Which can be used to check every request made to the portal by the user and make a redirection when needed?

- A. `com.ibm.portal.portlet.filter.PortletFilter`
- B. `com.ibm.portal.auth.SessionvalidationFilter`
- C. `com.ibm.portal.filter.RequestRedirectionFilter`
- D. `javax.servlet.http.HttpSessionAttributeListener`

Correct Answer: B

---

#### QUESTION 5

What is one benefit of using the Controller service provider interface (SPI)?

- A. Modifications can be made directly to the navigation model.
- B. The Controller SPI can be used to make changes to any virtual portal that is running on the system from the base portal.
- C. Changes can be made and applied to a running portal environment. The portal does not need to be restarted for the changes to take effect.
- D. The modifications that are made come into effect immediately for the controller and are reflected in the persistence layer without committing the controller.

Correct Answer: D

The Controller SPI provides controllers for portal resources. You can use these controllers to modify portal resources that are exposed by particular models of the Model SPI. Controllers offer methods to modify the topology and properties of the model and of its nodes. They expose the same interfaces as the corresponding read-only model, and they instantly reflect modifications that you apply to the controller. Note: While the modifications come into effect immediately for the controller, they not reflected in the persistence layer until you commit the controller and the changes that you made by it.
