QUESTION 1

Matthew has developed a new system module to provide static JavaScript outside of the theme WAR. What is one benefit of storing the files externally?

- A. External files are loaded first.
- B. External files are more secure.
- C. External files are compressed by default.
- D. External files are shared by multiple themes.

Correct Answer: D

The difference between a static website and a portal is that three kinds of HTML files exist:

theme.html

Defines the markup that is identical for all the pages that this theme is applied to.

layout.html

Defines the decoration of the content area that can be different between pages.

skin.html

Defines the decoration of the individual portlets on the page. If the files used by the theme are not part of the theme folder, and therefore not part of the theme structure,

then those files are named external. External files are shared by multiple themes.
