QUESTION 1

Which statement is true about the BI Bus?

- A. It is the name of the report process that is spawned and viewed in Windows Task Manager when a report execution request is processed.
- B. It monitors all http traffic flowing through the gateways and dispatchers.
- C. It is a set of protocols that govern communications among Cognos BI services.
- D. It uses a JDBC driver to connect to Content Stores in Sybase, SQL Server, Oracle and DB2.

Correct Answer: C

QUESTION 2

A user makes the following request: "I need to see actual sales compared with projected sales, and margin range for branches within each division, by product line, sales rep by sales manager, and cost center over time." Based on the user's request, Actual Sales and Projected Sales have been identified as required measures.

Which of the following other measures would be included in an initial dimension map?

- A. Unit Cost
- B. Average Sales
- C. Discount Amount
- D. Sales Variance

Correct Answer: D

QUESTION 3

When a user requests a certain piece of information, the interviewer may ask what the user would do with that information. From the techniques described in the BI Professional Workshop, why is the interviewer asking this particular question?

- A. To determine if the user is allowed access to that particular information and therefore should not be included in his subject area.
- B. To determine if the user understands how the information is functionally used within the organization.
- C. To determine if the information is a security concern and should therefore be made unavailable to other users.
- D. To determine if the information is an actionable item for the user and therefore part of a business requirement.

Correct Answer: D

QUESTION 4

A company wishes to coordinate the anticipated hiring activities of all of the departments in a given division of the organization. The CEO has mandated a limit of 50 total new hires for the coming fiscal year. The various departments must coordinate future hiring. The CEO would also like to see reports comparing the projected hiring vs. the actual number of new hires by department.

Which set of Cognos 8 components BEST supports the company's needs?

- A. Planning and Report Studio
- B. Report Studio and Analysis Studio
- C. Event Studio and Report Studio
- D. Planning and Data Manager

Correct Answer: A

QUESTION 5

Which of the following is correct regarding report execution requests?

- A. A low affinity request is directed to the same process that served up the originating low affinity request if the process is available and there is an available high affinity connection.
- B. A low affinity request can be processed using a high affinity connection when a low affinity connection is not available.
- C. An absolute affinity request does not require a connection because it has priority.
- D. A high affinity request can be processed using a low affinity connection if there are no high affinity connections available.

Correct Answer: D
