### QUESTION 1

A company has a manufacturing database they wish to interrogate. They know there are issues that have affected production quality over the last year but they are unsure exactly what factors are contributing to the problem. They would like to be able to quickly examine manufactured batches from multiple perspectives and, if there are any anomalies or any unusual trends overtime, they would then like to focus on specific batches to understand the details.

Which of the following Cognos 8 Components would BEST address their needs?

- A. Analysis Studio and Report Studio
- B. Report Studio and Query Studio
- C. Event Studio and Report Studio
- D. Analysis Studio and Metric Studio

Correct Answer: A

---

### QUESTION 2

Which Cognos Bl architectural component is written in C++?

- A. Batch report service
- B. Job service
- C. Monitoring service
- D. Presentation service

Correct Answer: A

---

### QUESTION 3

Which of the following statements describes the critical differences between a managed report and a query?

- A. A managed report is intended to be run on a regular execution schedule from a background batch process whereas a query is run interactively.
- B. A managed report is authored by trained developers whereas a query is authored by either trained developers or end users.
- C. A managed report is intended to be run on a regular execution schedule whereas a query is intended to be authored and run on-demand.
- D. A managed report prompts users for run-time parameters whereas a query does not.

Correct Answer: C

---

#### QUESTION 4

A user makes the following request: "I need to see actual sales compared with projected sales, and margin range for branches within each division, by product line, sales rep by sales manager, and cost center over time."

Which of the following is a dimension identified by the request?

- A. Cost
- B. Margin Range
- C. Actual / Projected
- D. Sales Range

Correct Answer: B

---

#### QUESTION 5

Which of the following is a valid strategy for addressing failover for the content store?

- A. Install active and passive instances of the content store.
- B. Install active and passive instances of the Content Manager service.
- C. Take advantage of failover protection in the Applications tier by installing the content store on a server that hosts multiple instances of the report service.
- D. Take advantage of database backup and failover strategies and policies already in place in the environment.

Correct Answer: D
