QUESTION 1

A company wishes to coordinate the anticipated hiring activities of all of the departments in a given division of the organization. The CEO has mandated a limit of 50 total new hires for the coming fiscal year. The various departments must coordinate future hiring. The CEO would also like to see reports comparing the projected hiring vs. the actual number of new hires by department.

Which set of Cognos 8 components BEST supports the company's needs?

- A. Planning and Report Studio
- B. Report Studio and Analysis Studio
- C. Event Studio and Report Studio
- D. Planning and Data Manager

Correct Answer: A

QUESTION 2

Which of the following describes common methods for enriching an initial dimension map?

- A. Add exception and range band dimensions and include additional metrics and calculations.
- B. Merge dimensions and include additional metrics and calculations.
- C. Include additional metrics and calculations and core metrics and dimensions from related business areas.
- D. Include additional metrics, calculations, and hierarchy levels, and dimensions from related subject areas.

Correct Answer: A

QUESTION 3

Why should an application's performance be monitored on an ongoing basis after it goes into production?

- A. Initial performance tests are usually too optimistic.
- B. There is little value in performance tests before a system goes into production.
- C. Usage patterns on applications tend to change over time.
- D. New releases of system and application software usually degrade performance.

Correct Answer: C

QUESTION 4

Which of the following requires additional configuration for installing Cognos BI in a development and production environment?

- A. The application in the development environment and in the production environment will use the Tomcat servlet container as the application server.
- B. The development environment will include workstations hosting Framework Manager and Cognos 8 OLAP Modeling, while the production environment will not.
- C. The environment contains customized port and firewall settings for the default http and application server port.
- D. The development and production environment will use data sources that are in Unicode.

Correct Answer: C

QUESTION 5

After a BI application is placed into production, all of the following are considered part of the process to prepare for the next iteration of the application, EXCEPT:

- A. record and track enhancement requests
- B. communicate with users to insure the application is delivering value
- C. periodically re-apply the V-test model against the developed components
- D. enhance application documentation to reflect errors and omissions

Correct Answer: C
