QUESTION 1

When comparing two differently grained facts directly against one another, the developer must:

- A. either write a union query or two reports that roll both facts up to a common level
- B. either roll up the lower grained fact to the higher level or allocate the higher grained fact to the lower level
- C. declare determinants at multiple levels in the dimensions of a DMR Framework Manager model
- D. ensure that all conformed dimensions shared by the facts have the same number of levels

Correct Answer: B

QUESTION 2

A company records when customers check into a service center. If there are too many customers waiting for the number of service representatives on hand, a manager wishes to be notified by an e-mail that contains a report showing the current condition.

Which of the following Cognos 8 Components would BEST address their needs?

- A. Office Connection and Report Studio
- B. Data Manager, Event Management, and Office Connection
- C. Office Connection and Query Studio
- D. Event Management and Report Studio

Correct Answer: D

QUESTION 3

All of the following describe design intent of an operational database EXCEPT:

- A. record the day to day operations of the company
- B. maximize the speed of inserts and updates to the database
- C. enhance reporting through foreign keys and indexes
- D. facilitate performing specific functional tasks

Correct Answer: C

QUESTION 4

Which statement is true about the BI Bus?

- A. It is the name of the report process that is spawned and viewed in Windows Task Manager when a report execution request is processed.
- B. It monitors all http traffic flowing through the gateways and dispatchers.
- C. It is a set of protocols that govern communications among Cognos BI services.
- D. It uses a JDBC driver to connect to Content Stores in Sybase, SQL Server, Oracle and DB2.

Correct Answer: C

QUESTION 5

Which of the following describes Key Performance Indicators (KPI)?

- A. Specific metrics, usually derived, by which a company measures its progress and success.
- B. Strategic goals, typically specified by executives, which describe the direction and objectives of the organization.
- C. Industry standards by which organizations measure themselves against others in their marketplace.
- D. Core, atomic level data items that provide input into higher level derived items which then appear on scorecards.

Correct Answer: A
