QUESTION 1

A user makes the following request: "I need to see actual sales compared with projected sales, and margin range for branches within each division, by product line, sales rep by sales manager, and cost center over time."

Which of the following is a dimension identified by the request?

- A. Cost
- B. Margin Range
- C. Actual / Projected
- D. Sales Range

Correct Answer: B

QUESTION 2

Which of the following is correct regarding report execution requests?

- A. A low affinity request is directed to the same process that served up the originating low affinity request if the process is available and there is an available high affinity connection.
- B. A low affinity request can be processed using a high affinity connection when a low affinity connection is not available.
- C. An absolute affinity request does not require a connection because it has priority.
- D. A high affinity request can be processed using a low affinity connection if there are no high affinity connections available.

Correct Answer: D

QUESTION 3

Which of the following must be moved manually instead of as part of a Cognos 8 deployment package?

- A. report output versions
- B. run history
- C. schedules
- D. system.xml

Correct Answer: D

QUESTION 4

When examining an operational (transactional) database, which of the following is considered a good indicator as to which tables contain fact data?

- A. Tables with the fewest number of columns
- B. Tables with the greatest number of rows
- C. Tables with the greatest number of foreign keys
- D. Tables with the fewest number of foreign keys

Correct Answer: B

QUESTION 5

A multi-server installation of Cognos BI must be performed.

Which of the following is a valid strategy for installing across multiple servers?

- A. Separate the gateway component from other server components to restrict report request processing to the Web server tier.
- B. Enable dedicated request processing, by installing a dispatcher in the Web server tier to act as a primary dispatcher for routing requests to other dispatchers.
- C. Scale the system vertically by installing one instance of all Cognos 8 services on a larger computer capable of managing more concurrent request threads.
- D. Enable load balancing of requests for content management services by installing multiple instances of Content Manager.

Correct Answer: B
