### QUESTION 1

While Cognos BI will support any data warehouse design, which of the following designs does Cognos recommend for new warehouse development?

- A. Operational Data Store
- B. Dimensionally Modeled Relational
- C. Normalized Enterprise
- D. Dimensional Bus

Correct Answer: D

---

### QUESTION 2

Which of the following is a common mistake made by designers when creating dimension models?

- A. Including alternate hierarchies.
- B. Including multiple date/time hierarchies.
- C. Splitting a single dimension into multiple dimensions.
- D. Adding dimensions and measures from other subject areas.

Correct Answer: D

---

### QUESTION 3

Which of the following statements best describes the Iterative Approach of application development?

- A. A prototype solution is developed after the initial user interviews. This prototype is then used as a basis for refining specific design requirements.
- B. The design step is repeated multiple times before proceeding to the development step. Each pass through the design step further refines the eventual solution.
- C. The solution is developed and delivered to the users. After approximately 2 weeks, the users are interviewed for any missing requirements and any new requirements form the basis for the next iteration.
- D. A prototype is created that addresses 80 to 90% of the business requirements. This is demonstrated to the users and their feedback is used to refine the prototype in subsequent iterations.

Correct Answer: D

---

#### QUESTION 4

Which statement is true about the BI Bus?

- A. It is the name of the report process that is spawned and viewed in Windows Task Manager when a report execution request is processed.
- B. It monitors all http traffic flowing through the gateways and dispatchers.
- C. It is a set of protocols that govern communications among Cognos BI services.
- D. It uses a JDBC driver to connect to Content Stores in Sybase, SQL Server, Oracle and DB2.

Correct Answer: C

---

#### QUESTION 5

Which of the following is correct regarding report execution requests?

- A. A low affinity request is directed to the same process that served up the originating low affinity request if the process is available and there is an available high affinity connection.
- B. A low affinity request can be processed using a high affinity connection when a low affinity connection is not available.
- C. An absolute affinity request does not require a connection because it has priority.
- D. A high affinity request can be processed using a low affinity connection if there are no high affinity connections available.

Correct Answer: D
