QUESTION 1

An administrator created a Content Store export and included the user account information.

How can a listing of the content be exported?

A. Within the export, ensure the Recording level option is set to Trace.

B. By default when the Content Store is backed up, a full detailed listing is generated and available in the Logs folder.

C. Modify the Advanced settings on the ContentManagerService by adding the parameter CM.DeploymentDetailEntireContent with a value of true.

D. Modify the Advanced settings on the ContentManagerService by adding the parameter CM.DeploymentIncludeConfiguration with a value of true.

Correct Answer: D

You can specify if configuration objects and their children are included as part of deployment. By default,

they are not included.

You can change the default setting using the advanced setting

CM.DEPLOYMENTINCLUDECONFIGURATION.

By default, it is set to False (do not include configuration objects in deployments).

To change the default to include configuration objects and their children, set it to True.

Incorrect Answers:

C: The CM.DeploymentDetailEntireContent setting affects deployment history. By default, the information saved in deployment records includes the progress and summary reports only. If you want to include more detailed information, change the recording level using the advanced setting CM.DEPLOYMENTDETAILENTIRECONTENT.
