QUESTION 1

Where in the IBM Endpoint Manager console can an operator find a custom analysis property definition?

- A. All Content domain > Analyses node, select the analysis in the list pane, and view the details tab in the work area.
- B. BES Support domain > Computers node, select the analysis in the list pane, and select the definitions tab in the work area.
- C. All Content domain > Computers node, select the computer from the list pane, and select the analysis result on the Summary tab.
- D. BES Support domain > Analyses node, select the computer from the list pane, and the definition will be next to the returned result.

Correct Answer: A

QUESTION 2

How is an automatic group defined?

- A. A computer group whose members are set by membership relevance.
- B. A computer group that can only be defined by IBM and is in an external site.
- C. A computer group that contains actions for all IBM Endpoint Manager computers.
- D. A computer group that is automatically generated when using the Windows Patch wizard.

Correct Answer: A

QUESTION 3

A new Fixlet was created in the site XYZ-Site, but after saving the Fixlet it is not seen in the site. Why?

- A. The Hide New Content option is enabled, so the Fixlet is hidden until it is more than 24 hours old.
- B. The Show New Content button is disabled, so the new Fixlet is not displayed until it is more than 24 hours old.
- C. The Hide Non-Relevant Content button is enabled, and since this is a new Fixlet there are no relevant systems making the Fixlet non-relevant.
- D. The Show Non-Relevant Content button is disabled, and since this is a new Fixlet there are no relevant systems making the Fixlet non-relevant.

Correct Answer: B

QUESTION 4

An operator just received an analysis in .bes format and would like to test the content. How can the analysis be imported into the IBM Endpoint Manager (IEM) console for testing?

- A. Only Fixlets and tasks can be imported into IEM, not analyses.
- B. In the IEM console select the Analyses node, right-click and select Import. The analysis will be activated automatically when it is imported.
- C. Double-click the .bes file, select the appropriate Site and Domain, and click OK to save. The analysis will be activated automatically when it is imported.
- D. In the IEM console, All Content Domain, Fixlets and Tasks node: right-click the .bes files to import. The analysis will be activated automatically when it is imported.

Correct Answer: B

QUESTION 5

Which two statements best describes a retrieved property in IBM Endpoint Manager?

- A. A valid property must contain string results.
- B. A property consists of a definition and a result.
- C. A property must reside in a non-master operator site.
- D. A valid property must contain four or more different data formats at the same time.
- E. A property is a system or configuration attribute reported by the client to the server.

Correct Answer: AE
