QUESTION 1

A Guardium administrator handles a large environment and has been asked to restore old data for auditors to review. This old data needs to be restored so that it does not impact the current data being collected or any merge settings. In order to keep the reports separate (old data vs current data), the administrator sets up an Investigation Center.

Which is a key requirement for users of the Investigation Center?

- A. The user must be in one of the groups INV_1, INV_2, or INV_3 (case-sensitive).
- B. The users must login as one of the predefined user accounts INV_1, INV_2, or INV_3 (case-sensitive).
- C. A separate user must be used with a role of either INV_1, INV_2, or INV_3 (case-sensitive).
- D. To correctly configure an investigation user, the user's Last Name must be set to the name of one of the three investigation databases, INV_1, INV_2, or INV_3 (case-sensitive).

Correct Answer: D

QUESTION 2

A Guardium administrator needs to use CLI commands to maintain the internal database, clean static orphans, produce static system reports and to monitor live network traffic filtered by IP addresses and port numbers.

Which combination of commands should the administrator use for these tasks?

- A. diagandiptraf
- B. diag and trace_route
- C. jptrafandsupport must_gather
- D. support must_gatherandshow network verify

Correct Answer: C

QUESTION 3

An administrator has a new standalone Guardium appliance that will be placed into production next week. The appliance will monitor traffic from a number of databases with a high volume of traffic. The administrator needs to configure the schedule to ensure the appliance internal database does not get full with incoming data.

Which data management function does the administrator need to configure?

- A. Purge
- B. Data Export
- C. Data Restore
- D. System Backup

Correct Answer: A

QUESTION 4

The Quick Search window does not show up on the GUI of a standalone Collector What technical feature should the Guardium administrator check first?

- A. That the Collector has at least 24 GB.
- B. That the Collector has at least 32 GB.
- C. That the Collector has at least 64 GB.
- D. Check the contract and verify whether that feature was purchased.

Correct Answer: A

QUESTION 5

A Guardium administrator installed an S-TAP but is not seeing any data in reports on the collector. The administrator discovered that an Inspection Engine is not configured for that S-TAP.

What is an Inspection Engine?

- A. A piece of software residing on the Collectors.
- B. Another software to be installed on the Database server.
- C. The same thing as the policy and it runs on the S-TAP to inspect the traffic in real-time.
- D. A set of parameters needed for the S-TAP to define how to monitor traffic for a particular database instance on a server.

Correct Answer: C
