QUESTION 1

A company wants to accelerate cloud adoption by integrating with popular public SaaS applications. The IBM Security Access Manager V9.0 deployment professional has determined there are Quick Connectors available for the chosen SaaS applications.

Which task does the deployment professional need to perform?

- A. Develop custom mapping rules for the SaaS Application provider
- B. Create the ServiceProvider (SP) Federation on the ISAM appliance
- C. Synchronize users\' enterprise credentials to the SaaS Application provider
- D. Select a Partner Quick Connect partner template for the SaaS Application provider

Correct Answer: D

QUESTION 2

The deployment professional wants to back up the embedded LDAP personal certificate, including the private key. They navigate to Manage System Settings -> SSL Certificates -> and select the "extract" option.

Which file format is the resulting certificate backup?

- A. .p12
- B. .kdb
- C. .jks
- D. .cer

Correct Answer: A

QUESTION 3

A stateful junction /WebApp is added to a Web reverse proxy instance with two backend HTTP servers. When one of the backend server stops responding to the requests, the users are getting the "Third Party Not Responding" error message even though one of the backend server continues to respond.

Which parameter needs to be added to the configuration file so that "Third Party Not Responding" error page is not rendered and the user is connected to the backend server that is responding?

- A. Use-same-session = yes
- B. Use-new-stateful-on-error=yes
- C. Failover-include-session-id= yes
- D. Enable-failover-cookie-for-domain = yes

Correct Answer: B

QUESTION 4

The IBM Security Access Manager (ISAM) V9.0 LMI SSL certificate is auto-generated by default.

When the LMI certificate is due to expire, how is it renewed?

- A. The ISAM Appliance will renew LMI certificate automatically.
- B. The ISAM deployment professional must issue `reset_lmi_cert` using command line interface.
- C. The ISAM deployment professional must re-generate it using LMI Manage System Settings-> SSL panels.
- D. The ISAM deployment professional must create a new self sign certificate using LMI Manage System Settings-> SSL panels.

Correct Answer: D

QUESTION 5

A network contains an additional network segment between the user segment and the appliance. This causes traffic to flow in and out on different interfaces.

How can this be overcome?

- A. Use static route
- B. Use a default gateway
- C. Use vector based routing
- D. Use Virtual Host junctions

Correct Answer: A
