### QUESTION 1

An IBM Security QRadar SIEM V7.2.8 Administrator needs to download a nightly configuration backup file from a past day through the Web Console.

Which steps must be followed to achieve this?

- A. Admin Tab -> System Configuration -> Backup and Recovery -> Generate new backup -> Save
- B. Admin Tab -> System Configuration -> Backup and Recovery -> Choose the name of an Existing backup
- C. Admin Tab -> System Configuration -> Backup and Recovery -> Import New Backup -> Select file extension -> Save
- D. Admin Tab -> System Configuration -> System Settings -> Database Settings -> Choose the name of an Existing backup

Correct Answer: B

The backups are listed in Backup and recovery section of the system configuration in the admin tab. You can click on the existing backup and it will show you the options to download it.

---

### QUESTION 2

What is the difference between Flows and Event data collected by IBM Security QRadar SIEM V7.2.8?

- A. Events are streamed each minute to the Event Processor. Flows are streamed immediately to the Flow Processor.
- B. Flow data is collected from different log sources. Event data is collected from internal or external network sources.
- C. An Event occurs at a specific time and is logged at that time. A Flow is a record of network activity that can last for seconds, minutes, hours, or days.
- D. An Event can span time lasting seconds, minutes, hours depending on the duration of a network session. A Flow happens at a single point in time and then is complete.

Correct Answer: C

---

### QUESTION 3

In which core functional layer of an IBM Security QRadar SIEM V7.2.8 architecture is data parsed and normalized?

- A. Data Searches
- B. Data Collection
- C. Data Processing
- D. Data Management

Correct Answer: B

---

#### QUESTION 4

An Administrator working with IBM Security QRadar SIEM V7.2.8 needs to limit the networking team to see just the Network Flow functions.

What should the Administrator do?

- A. Create a user with access to the Log Activity tab.
- B. Create a user role with Network Activity -> View Flow Content.
- C. Create a user role with Network Activity -> View Reference: Data.
- D. Create a user role which grants access to all the functions in the Network Activity tab.

Correct Answer: B

---

#### QUESTION 5

An Administrator working with IBM Security QRadar SIEM V7.2.8 needs to copy data and configuration backup files from the previous day to an off-site location.

What is the default location where these files can be found?

- A. /store/backup
- B. /store/exports
- C. /store/postgres
- D. /store/backupHost

Correct Answer: A

The default location is /store/backup. This path must exist before the backup process is initiated. If this path does not exist, the backup process aborts. If you modify this path, make sure the new path is valid on every system in your deployment.
