### QUESTION 3

Directors at a client meeting report experiencing delays in delivering new features to market. They indicate that a key cause is the handoffs between development and test teams. What is a key business benefit of IBM DevOps solutions that you should tell them about?

- A. IBM DevOps solutions will make all web applications run 20% faster.
- B. IBM DevOps solutions will lower customer-reported defect rates.
- C. IBM DevOps solutions will increase the risk associated with new customer-introduced requirements.
- D. IBM DevOps solutions will dramatically reduce costs and overall time to delivery.

---

Correct Answer: D

---

#### QUESTION 4

What are three main characteristics of an agent? (Select three.)

- A. Runs plugin steps (scripts to perform various actions)
- B. Is installed on UrbanCode server to allow communication with agent relays
- C. Runs automation tasks defined by an Ant script
- D. Represents the IBM UrbanCode Deploy agent software running on a server
- E. Is installed on each server on which commands must be executed

Correct Answer: BCD

C, not A: Apache Ant is a command line tool that is used to automate the build and deployment of applications. This plug-in calls the Ant executable to run one or more targets defined in a specified Ant script file, and is very useful for quickly integrating legacy automation into your UrbanCode Deploy Processes. IBM UrbanCode Deploy agents include a distribution of Ant, which is used by default, but other versions can be used by providing the path to the Ant installation directory in your Process Step. B, not E: Will the agent connect to an agent relay instead of directly to the server? The default value is N. If you specify Y, you are prompted to configure the following parameters: hostname or address of the agent relay the agent will connect to agent communication port for the agent relay HTTP proxy port for the agent relay

#### QUESTION 5

For which customer is IBM UrbanCode Deploy likely to be identified as the solution of choice?

- A. A customer that has a large number of legacy mainframe applications that need to be migrated to modern tools to support online and mobile usage
- B. A customer that is experiencing high testing costs due to poor functional test coverage and dependence on third-party applications to test developer changes.
- C. A customer that is experiencing cost overruns coming from large-scale projects involving multiple teams, including some that are outsourced
- D. A customer that is experiencing long lead times to deliver applications to production and difficulty coordinating across multiple applications with varying schedules

Correct Answer: D
