QUESTION 1

Assuming a system with configuration for tracking purchase orders as "PON", an operator needs to search for an inbound ASC X12 purchase order from a specific trading partner. Which correlation name should be selected along with the Sender ID from the Document Advanced Search?

- A. Name: PONValue: "actual purchase order number"
- B. Name: PurchaseOrderNumberValue: "actual purchase order number"
- C. Name: Purchase Order NumberValue: "actual purchase order number"
- D. Name: Purchase_Order_NumberValue: "actual purchase order number"

Correct Answer: A

QUESTION 2

A company has implemented a Web Service (WS) in IBM Sterling B2B Integrator (SBI). The WS is using unencrypted HTTP as transport. The SBI is deployed as a single node instance. How can this transport be configured to be encrypted?

- A. Change the URL in the WSDL file to https://...
- B. Change the transport to HTTPS in WS manager.
- C. Change the SSL settings in SOAHttpServerAdapter.
- D. Check in a SSL certificate and link to it in WS manager.

Correct Answer: B

QUESTION 3

A developer has been tasked with creating an inbound EDI process to support ASC X12 and EDIFACT EDI standards. A communications process has been created that retrieves the inbound EDI data on a scheduled basis from a Value Added Network (VAN). The file retrieved from the VAN contains a mix of EDIFACT and ASC X12 interchanges. Which asset is used to split the file by interchange and invoke the proper EDI standard specific Business Process (BP) for each interchange?

- A. Typing Service
- B. EDI Parser Service
- C. EDIDenveloping Service
- D. Document Extraction Service

Correct Answer: C

**QUESTION 4**

A developer has set up a File System Adapter to monitor a specific folder on the file system. When a file arrives in the folder, a Business Process (BP) will be executed. Where will the file payload be available to the rest of the BP?

- A. Primary Data
- B. Process Data
- C. Primary Document
- D. Process Document

Correct Answer: C

QUESTION 5

A company has many CA certificates in their IBM Sterling B2B Integrator (SBI). The company's SBI administrator is responsible for contacting the Certificate Authorities for certificate renewal before they expire. Recently the company decides to have their security administrator perform the job instead, and requires automated notification be sent to the security administrator 30 days prior to a certificate's expiration date. What is the most effective way to configure SBI to meet the requirements?

- A. Add the security administrator's email to all certificates management.
- B. Add the security administrator to the SBI administrator email distribution list.
- C. In the security.properties file, set emailRecipients =
