QUESTION 1

A client\\'s base selection table in the database uses more than one column to indicate a specific audience record. Is this a problem for the Unica Campaign system?

A. No, as long as one column is of a numeric data type.

B. No, any number of columns can be used to determine an audience.

C. Yes, only one column can be used within an audience.

D. Yes, multi column keys create performance limitations and should be avoided.

Correct Answer: B

QUESTION 2

The specialist is upgrading a multiple partition installation from 8.x to 8.5 What is the correct method to upgrade a multi-partition environment?

A. Run the migration for each partition.

B. Run the upgrade script for each partition.

C. Run the upgrade script once for all partitions.

D. Run the migration once for all the partitions.

Correct Answer: B

QUESTION 3

How can a specialist confirm what environment variables are actually set in Unica Campaign V8.5?

A. All the environment variables can be viewed from the setenv.sh script file.

B. By logging in to cxntest, and then running the "set" command to view all the environment variables.

C. By logging in to unica_svradm, and then running the "set" command to view all the environment variables.

D. By logging in to unica_acsesutil, and then running the "set" command to view all the environment variables.

Correct Answer: C

QUESTION 4

A specialist creates a numeric user variable called MinBalance and assigns an initial value of 100 to it. The specialist wants the Select process to return all IDs where the mapped field AccountBalance is greater than MinBalance. What is the correct syntax to use?

A. MinBalance

B. AccountBalance > MinBalance

C. AccountBalance > UserVar.MinBalance

D. AccountBalance is GT than UserVar.MinBalance

Correct Answer: C

QUESTION 5

An administrator gave a user access to two different roles in two different security policies. In one role, the user is granted access to function A. In the other role, the user is denied access to function A. What will happen when the user accesses function A?

A. Nothing happens, the administrator will need to perform additional tasks.

B. Based on the aggregation on permissions during evaluation by the Unica Platform, the user will be denied access to function A since theaccess was denied in one of the roles.

C. Based on the aggregation on permissions during evaluation by the Unica Platform, the user will be granted access to function A since theaccess was granted in one of the roles.

D. Based on the aggregation on permissions during evaluation by the Unica Platform, an error message will appear indicating that morepermissions need to be defined, since the two permissions in the two roles conflict with one another.

Correct Answer: B
