### QUESTION 1

What happens to the client data with the encryptkey option and include.encrypt options?

- A. Data will be encrypted by the Tivoli Storage Manager (TSM) server.
- B. All file spaces from the TSM server will be encrypted.
- C. Encrypted data will be backed up directly from the filesystem.
- D. Data will be encrypted at the client before sending it to the TSM server.

Correct Answer: D

---

### QUESTION 2

New OEM tape hardware not manufactured by IBM will be attached and defined to a Tivoli Storage Manager (TSM) server. These tape drives are new on the market and no driver for a Windows installation can be found. What can be used?

- A. TSM for SAN
- B. A generic tape driver
- C. Microsoft's tape driver
- D. The latest similar tape hardware driver from the manufacturer

Correct Answer: D

---

### QUESTION 3

The IBM Tivoli Storage Manager (TSM) Backup-Archive client has been installed on a Windows system having a working network connection with hostname WIN2K8-SRV1 and IP address 172.18.35.47. The TSM server is running and is located at IP address 172.18.35.100. No firewalls are in place and all other server and client communications parameters are left to their default values. When opening the TSM Backup-Archive client command line the result is: Which two steps are taken to avoid this error and successfully connect to the TSM server?

```
C:\Program Files\Tivoli\TSM\baclient>dsmc
IBM Tivoli Storage Manager
Command Line Backup-Archive Client Interface
Client Version 7, Release 1, Level 0.0
Client date/time: 04/23/2014 10:07:57
(c) Copyright by IBM Corporation and other(s) 1990, 2013. All Rights Reserved.
```

```
Node Name: WIN2K8-SRV1
ANS1017E Session rejected: TCP/IP connection failure.
```

- A. Run the dsmc command again, but add the -TCPSEVERADDRESS=172.18.35.100 option.
- B. Use the Backup-Archive client GUI's Preferences editor to update the server port value: and try connecting again.
- C. Update the node's dsm.opt file to include the option TCPSEVERADDRESS 172.18.35.100, and try connecting again.
- D. Update the node's dsm.sys file to contain the option TCPSEVERADDRESS 172.18.35.100; and try connecting again.
- E. Use the Backup-Archive client GUI's Preferences editor to confirm the options file contains a valid node name, and try connecting again.

Correct Answer: B

---

#### QUESTION 4

Which two statements are true when performing virtual machine backups directly to tape?

- A. Single file restores need more time.
- B. An additional disk pool is required for the VMware backups of user data.
- C. TSM meta data (control data) must reside on a disk-based storage pool.
- D. The environment is adjusted automatically for optimum tape performance.
- E. The same functionality is available regardless of the type of storage pool used.

Correct Answer: AC

---

#### QUESTION 5

What is the default setting for collocation when a primary sequential access storage pool is defined?

- A. collocation no
- B. collocation yes
- C. collocation group
- D. collocation filespace

Correct Answer: C
