QUESTION 3

How does an IBM Spectrum Protect administrator ensure that only the IBM Spectrum Protect server will start scheduled sessions with clients?

- A. SESSIONINITIATION PROMPTED
- B. SESSIONINITIATION CLIENTORSERVER
- C. SESSIONINITIATION SERVERONLY
- D. SESSIONINITIATION POLLING

Correct Answer: C

SESSIONINITiation controls whether the server or the client initiates sessions. The default is that the client initiates sessions.

SERVEROnly specifies that the server does not accept client requests for sessions.

QUESTION 4

Which two statements are true regarding migration? (Choose two.)

- A. It requires a storage pool hierarchy.
- B. it can only be started using an administrative command.
- C. It supports container pools.
- D. It can be controlled by migration thresholds.
- E. It supports copy pools.

Correct Answer: BD

QUESTION 5

What is the default method to back up an IBM Spectrum Protect V8.1 client\\'s file system data?

- A. Image
- B. Full
- C. Incremental
- D. Differential

Correct Answer: C

IBM Spectrum Protect uses the progressive incremental backup method. For this backup method, a first full backup of all data objects is created and in subsequent backup operations only changed data is moved to storage.
