QUESTION 4

What are the correct steps for moving the database to new directories?

A. stop the server, create the new directories, restart the server from the newly created directories

B. back up database, create new directories, remove the database, and restore the database with option ON

C. back up database, create new directories, and restore the database with option REPLACE

D. stop the server, create new directories, move files from old location to the new location, and restart the server

Correct Answer: B

DSMSERV RESTORE DB (Restore a database to a point-in-time) command is used to restore a database to a point in time. A volume history file and a device configuration file must be available.

The option On specifies a file that lists the directories to which the database is restored.

QUESTION 5

Which statement is true regarding scheduling the IBM Spectrum PROTECT STGPOOL process?

A. It can be scheduled to happen periodically during client backups.

B. It runs automatically and should not be scheduled.

C. It should be scheduled to only happen during expiration.

D. It cannot be scheduled.

Correct Answer: A

You cannot schedule multiple PROTECT STGPOOL operations to run concurrently. Wait for one PROTECT STGPOOL operation to finish before you start another.
