QUESTION 1

Which three steps should you perform to troubleshoot an issue with gathering response time breakdown data from WebSphere Application Server 7.0? (Choose three.)

- A. ensure that the WAS server instance is running on the tester server before trying to instrument it
- B. check that the account used for performing the instrumentation has administrator or root privileges
- C. check if WAS security is active and turn it off
- D. check that the application under test is deployed on a stand-alone WAS server
- E. check the WAS server that is behind a firewall

Correct Answer: ABC

QUESTION 2

How can you guarantee unique datapool values across a very large test?

- A. have each user draw from a private view of the datapool
- B. wrap when the last row of the datapool is reached
- C. fetch a datapool record only once for each virtual user
- D. segment the datapool so that each agent machine has its own datapool records

Correct Answer: D

QUESTION 3

Which four steps are required to import the response time breakdown from the production environment to troubleshoot performance? (Choose four.)

- A. select an existing set of execution results in the Performance Test Runs view and right-click for Import Response Time Breakdown Data
- B. enter the hostname to the Tivoli Monitoring for Composite Application Manager and the authentication information in the form of user ID and password
- C. specify the time period to import the data by supplying the start date and time, and end date and time
- D. select the data to import by clicking on Import Aggregated Statistics
- E. select the policies or traps to import the data
- F. specify the response time result data file

Correct Answer: ABCE

QUESTION 4

What is the term used for the Product that simulates virtual load on the application under test?

- A. Synthetic users
- B. Real users
- C. Virtual users
- D. Load balancers

Correct Answer: C

QUESTION 5

When you first run your test, the results are very spiky.

**Page Hit Rate**

How should you smooth your data?

- A. paced loop
- B. random selector
- C. comment
- D. delay

Correct Answer: A
