-  **800,000+** Satisfied Customers

QUESTION 1

Which four steps are required to import the response time breakdown from the production environment to troubleshoot performance? (Choose four.)

- A. select an existing set of execution results in the Performance Test Runs view and right-click for Import Response Time Breakdown Data
- B. enter the hostname to the Tivoli Monitoring for Composite Application Manager and the authentication information in the form of user ID and password
- C. specify the time period to import the data by supplying the start date and time, and end date and time
- D. select the data to import by clicking on Import Aggregated Statistics
- E. select the policies or traps to import the data
- F. specify the response time result data file

Correct Answer: ABCE

QUESTION 2

After a test run, the tester sums up all the individual requests response times but discovers that the total is not equal to the overall page response time. What are three causes of the difference? (Choose three.)

- A. There is a defect in IBM Rational Performance Tester 8.2 that will be fixed in the next fix pack.
- B. The page response time is more than the sum of the requests because it accounts for time taken to set up the connections.
- C. The page response time is less than the sum of the requests because several requests could have been executed concurrently.
- D. The page response time is more than the sum of the requests because custom code for response correlation in a page is executed serially and is added to the page response time.
- E. The page response time is less than the sum of the requests because the response for the request is in the system cache.

Correct Answer: BCD

QUESTION 3

Why should you clear the cache when you record a test?

- A. to force the browser to download all page elements resulting in a more accurate test
- B. to force the browser to download all page elements resulting in longer page load times
- C. to simulate a new user who has never used the application

D. to simulate actual browser behavior

Correct Answer: A

QUESTION 4

What is the easiest way that a current timestamp in a page request can be generated?

- A. by writing a custom code method that invokes java.util.Date
- B. by writing a custom code method that invokes java.util.Timer
- C. by correlating the timestamp value to a built-in datasource
- D. by using the NOW() Excel function in a column of a datapool

Correct Answer: C

QUESTION 5

Which three factors affect the performance test measurements? (Choose three.)

- A. sampling interval
- B. network bandwidth
- C. think time
- D. verification points
- E. user load

Correct Answer: BCD
