### QUESTION 1

A system administrator is using the debug features of the IBM Assembly and Deploy Tools (IADT) to resolve an error in a wsadmin Jython script. Which control on the Debug view can the administrator use to progress through the statements without redirecting to any encountered functions?

- A. Resume
- B. Step Into
- C. Step Over
- D. Step Return

Correct Answer: C

---

### QUESTION 2

A system administrator needs to configure a WebSphere Application Server runtime through a properties file. The administrator needs to verify that the properties file is correct and can be applied. How should the administrator do this?

- A. Using the applyConfigProperties command with the -validate option.
- B. Using the validateConfigProperties command with the -validate option.
- C. Using the applyConfigProperties command; the verification is done automatically during application of the configuration properties.
- D. Using Integration Solution Console's Configuration problems panel with Maximum: Validate all documents set.

Correct Answer: A

---

### QUESTION 3

A system administrator has made an unintended configuration change in the Integrated Solutions Console (ISC). Before committing the changes, the administrator was logged- out due to the timeout restriction. After logging back in, how can the administrator discard the uncommitted changes made in the previous session?

- A. Click the "Review" link on the Messages area.
- B. Click the "Discard" button on the Save window.
- C. Select the "Work with the master configuration" choice.
- D. Choose the "Recover changes made in the prior session" option.

Correct Answer: C

---

#### QUESTION 4

An administrator needs to monitor the frequency of garbage collection (GC) cycles that are triggered when a typical client load is run against the server. How should the administrator monitor the frequency of garbage collections?

- A. Use the Log Analyzer to view the verbose GC logs.
- B. Use the HPEL Log Viewer and look for System.gc() calls.
- C. Use the Tivoli Performance Viewer (TPV) and select the JVM Runtime.
- D. Run the performance servlet to gather the verbose GC data.

Correct Answer: C

---

#### QUESTION 5

A mixed version and flexible management topology is required for a new application. For ease of administration, the system administrator needs to register a WebSphere V7.0 stand-alone node with a WebSphere V8.0 job manager. What must the administrator do before registering with the job manager?

- A. federate the V7.0 stand-alone node with a V7.0 node agent
- B. federate the V7.0 stand-alone node with a V8.0 node agent
- C. register the V7.0 stand-alone node with a V7.0 administrative agent
- D. register the V7.0 stand-alone node with a V8.0 administrative agent

Correct Answer: C
