QUESTION 1

Web clients are seeing error messages when they try to access a Java EE application. In order to isolate the system component that may be causing the problem, the administrator decides to verify the request flow from a web browser. In what order should the components be examined?

A. Web server, embedded HTTP server, web services engine

B. Web server, HTTP plug-in, embedded HTTP server, web container

C. Embedded HTTP server, web services engine, web container

D. Load balancer, web server, name server, embedded HTTP server, web container

Correct Answer: B

QUESTION 2

A system administrator needs to install the IBM Installation Manager for WebSphere Application Server Network Deployment V8.0 using a non-root account. What step must the administrator take so that the installation can be managed by two different non- root user accounts? Install the IBM Installation Manager:

A. in group mode.

B. in non-administrator mode.

C. using the configurator administrator role.

D. using a primary and secondary account.

Correct Answer: A

QUESTION 3

A system administrator has made changes at the cell scope in the Integrated Solutions Console (ISC) of the deployment manager and needs to trace the propagation of the configuration change. Where should the administrator expect these changes to be persisted?

A. master repository, node repository

B. master repository, node agent, node repository

C. deployment manager, node agent, server repository

D. deployment manager, node agent, configuration database

Correct Answer: A

QUESTION 4

An application server is configured with the default garbage collection (GC) policy. An administrator needs to load test different GC policies. How can the administrator change the server\\'s GC policy?

A. Start the node agent from the command line using the -Xgcpolicy option, and specify the server name.

B. Start the administrative agent from the command line using the -Xgcpolicy option and specify the server name.

C. Use Integrated Solutions Console (ISC) to navigate to the server\\'s JVM configuration and add an appropriate -Xgcpolicy setting.

D. Use Integrated Solutions Console (ISC) to navigate to the deployment manager\\'s JVM configuration and add an appropriate -Xgcpolicy setting.

Correct Answer: C

QUESTION 5

A system administrator has completed a WebSphere installation using the IBM Installation Manager. Which tool, using the default settings, can the administrator use to generate an HTML file verifying the version of WebSphere installed? Execute the:

A. postinstall command.

B. versionInfo command.

C. genVersionReport command.

D. Installation Verification Tool (IVT).

Correct Answer: C
