QUESTION 1

What are two automated administrative tasks that can be done with configuration checkpoints? (Choose two.)

- A. delete
- B. restore
- C. archive
- D. backup
- E. compress

Correct Answer: AD

If you want to preserve delta checkpoints, you must archive checkpoints before they are automatically deleted.

A delta checkpoint is created automatically by the product each time a configuration change is made.

Incorrect Answers:

C: The product does not have an automated function for archiving.

QUESTION 2

What is the main difference between interim fixes and product fix packs as they relate to IBM WebSphere Application Server?

- A. Interim fixes typically contain new features or functionality ahead of future product fix packs.
- B. Product fix packs are a combination of interim fixes and internal fixes to make patching easier.
- C. Product fix packs are generally reserved for new features or functionality whereas interim fixes are provided only to fix known issues.
- D. Product fix packs bring WebSphere Application Server to a new product level whereas interim fixes provide corrective service for specific known problems.

Correct Answer: D

Product fix packs contain bundled service to bring WebSphere Application Server up to a new product level. Interim fixes provide corrective service for specific known problems.

QUESTION 3

A system administrator has downloaded IBM WebSphere Application Server binaries and created a local IBM Installation Manager repository.

What can the system administrator do to ensure only this local Installation Manager repository is used during installation of the product?

- A. Create a preference for the public repository.
- B. Use the Packaging Utility to create the repository.
- C. Make sure the metadata for the repository includes the value "local".
- D. Clear the Search service repositories during installation and update option.

Correct Answer: B

QUESTION 4

An administrator has made a configuration change to a server in network deployment topology.

Which statement describes the synchronization process in this scenario?

- A. Configuration changes on a server are prohibited.
- B. Node agent synchronizes its files with the master repository.
- C. Configuration changes are maintained on the node's master repository.
- D. Node agent synchronizes its files with the master repository when the deployment manager is restarted.

Correct Answer: C

QUESTION 5

Which of the following is a requirement when performing a silent install?

- A. A response file must be used.
- B. Artifacts must be saved for performing a roll back.
- C. The repositories must be defined before starting the install.
- D. The repositories must be downloaded before performing the install.

Correct Answer: A
